EXAMINER'S AMENDMENT

- An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
- The application has been amended as follows: On page 1, of the specification, line 8, after, "09/857,363", please insert, "now Patent No. 6,801,659".

REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed to a computer-implemented method for encoding a sequence of handwritten strokes representative of constituent strokes of an ideographic character to obtain an encoded input sequence. Independent claims 1 and 29 identify the uniquely distinct feature, "for assigning a first code to an encoded input sequence responsive to a determination of the shape of a first stroke and a determination of the size of said first stroke, said first code being predefined to represent said shape of said first stroke and said size of said first stroke, said first code being sufficiently unique to distinguish said first code from other codes representing other permutations of shape and size of said first stroke"; Independent claim 13 identifies the uniquely distinct feature, "for searching through plurality of code sequences to find matched sequences, each of said matched sequences representing one of said plurality of code sequences whose codes contain at least an encoded input sequence, wherein a first code sequence and a second code sequence are among said matched sequences and obtaining a first complete character from a first code sequence as a first candidate selection in a list of

candidate selections and obtaining a second incomplete character from a second code sequence as a second candidate selection in a list of candidate selections".

The closest prior art, Yu (USPN 5,790,055), discloses method for encoding Chinese and Japanese ideographic characters for computer entry, retrieval and processing; while Wong (USPN 4,505,602), discloses method for encoding ideographic characters and Leung et al. (USPN 4,379,288), disclose means for encoding ideographic characters, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
